WORK EXPERIENCE

Jun 2023 - Present

MTN Nigeria

Software Developer

- Collaborating with a group of software engineers and designers to develop user-friendly platforms, leveraging on technologies such as NextJs, Reactjs, typescript, redux, and tailwindCss.
 - Optimized the platform for performance and scalability, utilizing best practices and industry standards to ensure that it is able to handle large volumes of traffic and user interactions.
 - Participating in daily stand-up meetings, sprint planning sessions, and retrospectives, providing regular updates on project status and contributing to team discussions on how to improve performance and efficiency.
 - Working in an Agile development environment, using Jira and Git to manage and track project progress, prioritize tasks, and ensure timely delivery of high-quality software.
-

Nov 2022 - Jun 2023

Bingdum

Full Stack Developer

bingdum is a social dating app that brings people living in the same city together

- Develop a real-time chat feature using WebSockets and next.js, resulting in a 80% increase in user engagement and customer satisfaction, using the latest technologies of Next, reactNative, Redux Toolkit, node.js and Socket.io.
- Successfully Implemented and developed a robust global search functionality within the application, which allows users to quickly and easily search across multiple data sources and retrieve relevant information, improving search times by up to 50% and reducing server load by 70%.
- added a post functionality to allow users share their stories
- added gesture and facial verification to filter out scammers using aws recognition and awarding users a blue tick after passing the verification.
- implemented geo location search, making it easy for users to see and chat with other users living in the same city
- implemented 2FA to avoid account compromise, and added google and apple login for easy login
- added different room chat for user interest

Apr 2019 - Nov 2022
